

I'm not a robot!

Powered by over 25 years in the tireless pursuit of innovation, Sonar is reinventing the modern recording studio. The creative experience just the sonar offers: advanced technology, effortless workflow and an interface that amplifies inspiration. Easily compose music and full performances with creative composition tools and instruments capture inspired performances with untouched quality and unlimited audio and midi tracks correct errors, organize pieces and manipulate tone, time and many other aspect of your recordings achieve pro-style and silver sounds and create large, clear and dynamic mixes with advanced mixing tools polish your finished blends with perfectly integrated mastering tools Export and publish your music directly on YouTube, SoundCloud, Facebook and more brough your projects with the award-winning, fully customizable Skylight interface To suit your workflow, enjoy unlimited audio, midi, instrument, loop and auxiliary tracks on all projects that experience the best audio engine in the industry, VST3, Touch and all the leading technologies you expect from a leading DAW, choose three versions Designed to meet your needs and budget, whether you are a composer, producer or composer, sonar has the instruments you need To build your production from the beginning to track, mix or master, with FX ranging from essential to unique sonar, you covered yourself. Build, adjust, adjust and complete your productions effortlessly with an impressive range of internal features. Free results of challenging the status quo of audio software for more than a quarter of a century. The first to offer this precision audio technology, the 64-bit Mix Advanced Mix delivers clean, dynamic and accurate mixes every time. Don't worry about it againSignal degradation. You can always be sure that your plug-ins are issuing the highest possible quality. SONAR supports the more stable, accurate and efficient plug-in format to machines so you can use more FX and synths in your project. Another industry first, SONAR ReAAAs compatibility with touch devices adds analog feel and workflow-enhancing efficiency. Compatibility comes standard. We've always been on top of our game, ensuring support on all the most current Windows platforms. Harness the power of Audio Random Access for seamless integration with synths and modern editing tools. Regardless of your taste, SONAR ReAAAs all-encompassing palette of tools will help you get the job done right. Organize loops, phrases, and one-shots into cells and columns for real-time triggering. Build complex soundscapes with multiple grooves, alternate sections, drops, breakdowns - all playable in real time from one or more MIDI controllers. Trigger synths and other external MIDI gear. Build beats with SONAR ReAAAs integrated Step Sequencer. Auto-Populate and tweak patterns with per-lane and per-step flams, offsets, swing, and probability control. Record solo or full-band sessions with automated audio track recording. Get classic analog warmth and response with a variety of console tape, and tube emulation modules. Create the perfect performance with easy-to-use tap tempo and time signature tools. Forge your sound through multiple effects and automation. Categorize tracks in folders, and navigate through your project with ease. Compare a song with a previous version of your file. The exact frame with a single click. All you need to do is point to the original file dialog using VST3.0. Distribute windows across multiple monitors simultaneously so you always have a clear view of your work. Mix and match tracks with a powerful new layer system designed for the ultimate audio workstation. SONAR X3 boasts a powerful new layer system designed for the needs of any musician, regardless of skill level or budget. Compare VST3.0. Try it free for 16 days. Input. Simultaneously Edit Tools for Move, Fade, Cut, Copy, Loop, and Swap Mix 64 Tracks with 1 Atse 3Acov odnauQ.
